## REPORT TO THE MEMBERSHIP OF THE MBTA RETIREMENT FUND

## **Executive Director's Message**

MBTARF management is pleased to report the Fund's preliminary investment results for 2014 along with an update on the environment in which these results were achieved.<sup>1</sup>

Conditions that prevailed during 2014 presented opportunities as well as challenges for large, well-diversified institutional investors. Across U.S. markets, modestly positive economic news, accommodative monetary policy, low inflation and declining bond yields boosted stock and bond returns. In contrast, however, slowing global growth, deflationary fears, and a strengthening dollar contributed to negative returns for many non – U.S. investments held by pension funds.

Against this setting, based on preliminary information, the MBTARF's investment portfolio achieved a 5.5% gross investment return in 2014.<sup>2</sup> The approximate market value of the Fund was \$1.590 Billion as of year end. The 2014 result followed a 17.08% gain for the Fund in 2013. According to multi-year measures the Board utilizes to assess long-term results, the Fund continues to make progress.

For the three years ending in December 2014, the Fund generated an annualized return of 12.7%, outperforming its policy index and exceeding Taft-Hartley, public and corporate median returns by 0.9%, 1.4% and 1.3%, respectively. For the five-year period, the Fund's annualized return of 10% exceeded its policy index and ranked in the top half of all pension fund peer groups.<sup>3</sup>

Leading contributors to the Fund's 2014 investment return included the U.S. large company stock portfolio, which gained 10.4% and open ended real estate equity funds, which gained over 12%. The Fund's U.S. small cap and global equity portfolios returned 2.4%, and 6.4%, respectively, while the international equity portfolio lost 6.2% due in part to the dollar strengthening against the Euro, Yen and other foreign currencies.

The fixed income portfolio returned 4.9%, trailing the index due to an unexpected decline in U.S. bond yields that boosted returns of interest rate sensitive securities, but detracted from portfolios positioned to manage interest rate risk by underweighting portfolio duration (a measure of interest rate risk). Within the fixed income category, domestic managers that held interest rate sensitive long-term U.S. corporate and government bonds generated middle to high single digit returns.

Conditions that prevailed in late 2014 continue into early 2015. In the U.S., these include mostly positive economic news, accommodative monetary policy and low inflation. Outside the U.S., developments include the European Central Bank quantitative easing program, declining economic growth in emerging markets, geopolitical risk and low energy prices. Challenges include decelerating projected growth in mature economies, low bond yields, elevated interest rate risk in the U.S. and concerns about an eventual exit from unprecedented accommodative monetary policy.

## Executive Director's Message (cont'd)

The portfolio's asset allocation structure is designed to position the Fund for risk-adjusted returns in line with Fund objectives and risk tolerances over time, through changing market conditions. The portfolio is diversified based on an asset allocation policy that was developed to meet the Fund's long-term return objective while limiting risk or volatility.

The Board will continue to review potential modifications to the Fund's asset allocation

structures as the economy and markets evolve with assistance from the Fund's staff and investment consultant.

We will update you when the preliminary investment performance numbers are final.

Yours Respectfully,

Michael H. Mulhern **Executive Director** 

## **David Hanson** says "We're always learning more to keep up with financial trends so that retirees can know that their investments are in good hands."

David Hanson had to pass three different sixhour exams, requiring hundreds and hundreds of hours of study, in order to become a Chartered Financial Analyst (CFA) last fall. David says all the hard work was worth it for

the knowledge he gained that will help him analyze potential investments for MBTA retirees.

As a research associate for the MBTA Retirement Fund, David researches potential Fund investments, especially "alternative" investments, those that aren't traditional stocks or bonds. Alternatives are roughly 30 percent of the Fund's portfolio. These can include real estate, private equity, and hedge funds, which all provide diversity to the Fund's investment portfolio.

"The Retirement Fund puts a large emphasis on continual staff education," says David. "We're always learning more to keep up with financial trends so that retirees can know that their investments are in good hands."

David was born and raised in Hyde Park. In 2010, he graduated from Boston College's Carroll School of Management with concentrations in Finance and in Accounting and Info Systems.

David has ridden the T all his life. He grew up taking the 32 bus to Forest Hills to catch

the Orange Line, and at Boston College, he was a frequent Green Line passenger. After graduation, he moved to Dorchester along the Red Line, and now lives in Dedham, just minutes from the Franklin commuter rail

David started working as an intern at the Retirement Fund during the summer after his sophomore year of college, and continued through his subsequent college years. As an intern, he assisted with investment research and performance reporting, and occasionally filled in to answer the phone and help members with their questions about benefits.

"Sometimes it's nice to get away from the numbers and learn about the real impacts of the benefits," says David. "It's great to see that the work I'm doing on the investment side is making a difference in the lives of retirees."

In addition to his CFA certification, David holds a Chartered Alternative Investment Analyst (CAIA) designation, which he completed two exams to earn in October.

"It's important that all our employees get the continuing education they need to best support our members," says Executive Director of the MBTA Retirement Fund Mike Mulhern. "We're proud of David's achievements and very glad to have his expertise as we strive to make the best possible investments for future retirees."

 $<sup>^{\</sup>mathrm{1}}$  The preliminary returns do not include all fourth quarter private equity and closed end real estate funds.

<sup>&</sup>lt;sup>2</sup> All quoted returns are unaudited and gross of fees – audited values will be provided in annual report.

<sup>&</sup>lt;sup>3</sup> InvestorForce Taft-Hartley, Public and Corporate Fund Universes (net).

# **Congratulations**
